### About This Content

A cold winter has hit Carcassonne. The citizens waste very little time before preparing hot beverages and sweet pastries. Life around Carcassonne slows down. Occasionally, the people catch a glimpse of a new character, the gingerbread man.

The gingerbread man offers an additional possibility to score each time someone draws a gingerbread man tile.

carcassonne winter edition gingerbread man rules

It was a great experience for me to see all 5 episodes with an extra bonus material. However, compilation of these videos & small games has one big minus - the price is very high.

7/10. Good little non-frustrating, cheap, Egyptian pyramid exploration simulator.

Be an archaeologist, like Indiana Jones.

Or imagine you're a proper archaeologist. Like Daniel from Stargate.

I'm liking it.. This game is another waste of disk space.....

Pros : It can run...with my GTX1080 i still got around 60FPS....

Cons :

1. No clear instruction
2. No Clear objective
3. You can only walk and walk in a strange 3D world.....

I have deleted this so called "game" from my disk....

. ce jeu est genial

THIS GAME IS LEGEN...wait for it...DARY,LEGENDARY. Amazing novel, worth the time (and money I guess). Just get some ambient/zombie music and you're set.. I would describe this game as an interactive short story, or a piece of explorable artwork. It's dark, atmospheric and haunting, but also bittersweetly beautiful. I really wish there were more games like this in the world. Games with eerie atmospheres and mystery and imaginative writing, requiring slow exploration and for the player to be like a giant sponge, absorbing the worlds they've been immersed in and the emotions they evoke. Games that require the player to meet the artist halfway and philosophically/emotionally engage with the ideas being shared. My only criticism is that I would have liked more of it, which in the end isn't really a criticism at all.

Cosmophony is, in general, quite a fun rhythmic shooter. I actually found myself needing to use the music to maneuver throughout the levels! There are 5 levels, split into 10 sections each which you can practice individually in the practice mode. Graphically, this game at first gave me a bad impression, but then i ignored the graphics and started to see through to the gameplay.

My biggest complaint about this game is that the level can launch things at you so quickly that it almost seems unfair the first few times you play. It could call itself fair by saying that you could get past these obstacles with ninja-like reflexes, but it still is something that will make you rage. There's also quite a difficulty spike once you get to level 4. I found myself beating the first 3 levels in an hour, and then that level took me about 1.5 hours (I still have not beaten level 5).
