I tried error checking, but it requires you to format it I tried data recovery software but all files come out corrupted.. My USB is Imation 4GB Any suggestions? You can try (free, cross-platform, and open source) - it works on almost all drives on a system, regardless of whether or not the drive is internal or external.. I would like to ask if you know how to fix a corrupted USB? I've tried the diskpart command but it didn't work.. 5, and check your work Dec 20, 2015 Fix All flash drive problems by resetting it's software - Duration: 3:54.
